AidAim MsgCommunicator Download

- The library aims at developing and providing you tools for building advanced messaging and chat systems. - The aim of the library is to support advanced features such as a database, encryption, random access, offline mode, persistent connection, UI, file transfer, message history, search, multiple simultaneous connections, multi-purpose operation of messages, display of news, and number of users. - With this library, you can build a product and provide a service to the users. Included features: - Data tables - Database architecture - Message architecture - Contact history - File transfer - Multiple clients - Server mode - Peer to peer mode - Offline mode - Support for most mainstream databases - Support for encryption functions - Multi task features - Dynamic addressing for objects - Messages copy feature - Transparent security system - Server independent code with the help of sub-files - Extremely large number of simultaneous connections - Online and offline modes - History management - Persistent connection - Auto refresh - Direct serializable objects - Displaying news with examples - Search with examples - Text, binary, file, image data can be transferred with a press of a button - Archive and search functions to the messages - Encryption to keep your conversations with sensitive data safe - The source code is available for your use - A detailed documentation - Many guides and examples - Numerous samples for documentation - Examples for all user interface types, such as a MDI, MDIParent, and MDIChild AidAim MsgCommunicator Licence: - General License - Demo License AidAim MsgCommunicator Help: - Demonstrations - QuickStart - Manual AidAim MsgCommunicator Changelog: - Sep-28-2009 -Updated components and examples - New help files - Improved documentation - Improved manuals - Added more auto-generated documentation - Added more updated files - Renamed unversioned files to versioned - Jul-25-2009 -Accuracer 3.5 and MS SQL Server 6.0. The database update is from the previous release. - Updated Files - Jun-12-2009 -Binary to string conversion functions have been added. - Updated demos - Updated examples - Updates to help file - Updated manuals - Updated to use updated SQL My

What's New in the?

StirRestore is intended to facilitate instant messaging systems and is about as basic as the "bullet" is to this group of components. StirRestore is a component you can use to create instant messaging applications with in your Delphi or C++ Builder application. Such applications are similar to AIM, Jabber, ICQ and more. StirRestore features include a lot of components for creating contacts, sending and receiving messages, storing info about contacts, searching for contacts etc. In addition, the library includes a server component that can be used with a client. This means that you can create your own IM servers for your clients. With StirRestore, you can also store info about contacts, messages and other details. The component can work directly with SQL database, it can be used as a client or server component, and it also supports Firebird databases. Using the component's integrated help mechanism and a rather comprehensive user manual, you can easily understand the basic operation of StirRestore. What's new in this release: • Fixed bugs in the Microsoft SQL 2000/2003/2008 server components • Improved SysUtils components • Improved ImportTask components • Fixed an Error when importing a Firebird database • Supported Visual Studio 2008 There are a few features you can use with StirRestore: - Contacts and Groups - Messages - Search and Transfers - Shared Files - Online/offline status - Client Side Scripting - CalDAV Support - Encryption Support - Mail storage - ...more! What's new in this version: • New File upload support • Added QuickSearch for the contact list • Added a ReadMessageReply option to the reply to tab • Added Search and Transfers features • Added Encryption Support • QuickSearch support • Added MySQL Support • Updated the documentation New in this version: • Added a config section, so you can easily change the default options • Changed the interface of the component • Added an error report feature The components in this package support: • ActiveSync • AppleSafari • Aperture • AOL • AOXTab • Avanquest Email • Battery • BlackBerry • Blackberry Messenger • Cisco IM • Clock • Compuserve • Constant Contact

System Requirements:

Windows 7, Windows 8, Windows 8.1, Windows 10 Mac OS X 10.9 or higher You must have DirectX 11. Possible Drivers and other required programs: Here is the link to the below drivers and programs Note: Please read the list of required program carefully as there may be missing and/or outdated drivers. Here is the list of required program and the version: *Sorry for the inconvenience, I am not responsible for any damages that may occur. **Please be aware that these
