Lighting design for pixel light, RGB tube and wall washer

Lighting design for pixel light (170pcs for example)

1. Create a new led file in Ledwalker V1.5

If we design the 170 pcs pixel lights (one light is a pixel) with 10 rows and 17 columns, so we can built a new file with 10 rows, 17 columns, ensure all the pixels in the range, click OK button.

| | | | |
|---------------|----|-------------|----|
| Row number | 10 | Grid width | 12 |
| Column number | 17 | Grid height | 12 |

2. Signal line define

Select Line, For regular connection like tubes, wall washer, pixel lights, you can use belowed method. Our defining method: **press Shift, Alt or Ctrl button and drag your mouse at the same time**. Shift, Alt or Ctrl decide the connection way; dragging your mouse decide the direction.

No Shift, Alt and Ctrl Way

Shift Way

Ctrl Way

Alt Way

Here The "Ctrl Way and Alt Way" here are better than "no Shift, Alt and Ctrl Way" and "Shift Way" when considering the signal and power transmissions. Here click the button can delete the wrong connected line. The button "+" for zoom in, "-" for zoom out can control the size of the holes. Click the button to save the line file (XXX.line) into your PC. And also save the file "XXX.wst" by "File — SaveAs".
